

Study in the UK: Explore summer intake opportunities

UK is recognised globally as a centre for higher education and boasts of universities that are ranked amongst the best in the world. “UK offers really good post-study work opportunities through the 2-year Graduate Route. As there is no limit on how many international students can apply for it and there are no professional ties to a specific job/employer, students can have multiple jobs at any skill level and can switch to skilled work route at the convenient time. They can stay and work in the UK even after their graduate route expires,” says Srikar Alapati, Managing Director of Global Tree, adding, “Recently, 15 UK cities were ranked amongst the best in the world as per QS Rankings 2024 and placed UK one place higher amongst the Indian and other international students.” As the univer-

Srikar Alapati

sities are gearing-up for the upcoming summer intake, it’s a golden opportunity for the aspiring students, says Srikar: “The summer intake is less-competitive. Limited number of students appear for it and the chance of securing seat is high. Batch size is also smaller and this widens the scope of getting better placements and internships. The May

intake is the best choice for students who do not want to waste an entire year waiting. Though scholarships are more common for the fall intake but the May intake can be lucrative as well and scholarships may range from 1000 GBP-6000 GBP.”

BENEFITS OF STUDYING IN UK:

- Multi culture Diverse exposure
- 1year Masters
- Safest destination for International students

- Internship opportunities while studying

POPULAR UNIVERSITIES:

- Northumbria London
